

ASHINDRA DWIVEDI

Network & Wireless Engineer | Cisco SD-Access & SD-WAN

+91-7376012145 | ashindradwivedi60@gmail.com | Lucknow, Uttar Pradesh | [linkedin.com/in/ashindra-dwivedi](https://www.linkedin.com/in/ashindra-dwivedi) | <https://ashindra32.github.io/>

PROFESSIONAL SUMMARY

Network and Wireless Engineer with 2+ years of hands-on experience designing, deploying, and optimizing enterprise LAN/WAN, SD-WAN, and WLAN solutions across multi-site environments. Hands-on expertise in Cisco SD-Access fabric design, wireless site surveys using Ekahau AI Pro, RF planning, and Fortinet FortiGate security integration. Proven track record delivering high-availability network infrastructure with measurable improvements in coverage, segmentation, and operational efficiency.

CORE COMPETENCIES & TECHNICAL SKILLS

Wireless & RF	802.11a/b/g/n/ac/ax (Wi-Fi 6), RF Propagation, Channel Planning, RSSI/SNR Optimization, Co-channel Interference Mitigation, AP Density Design, Roaming (802.11r/k/v)
Site Survey Tools	Ekahau AI Pro — Predictive, Passive & Active Surveys, Heat Map Analysis, Coverage Validation, Interference Detection, RF Report Generation
Cisco Platforms	Cisco DNA Center / Catalyst Center, SD-Access Fabric, Cisco ISE, Catalyst 9000 Series, Cisco WLC, IOS-XE
SD-WAN & Routing	Cisco SD-WAN (Viptela), BGP, OSPF, EIGRP, VLAN Segmentation, STP, VTP, Port Channels, Route Summarisation
Network Security	Fortinet FortiGate Firewall, Network Access Control (NAC), VPN, 802.1X Authentication, Network Segmentation, Perimeter Access Control
Protocols & Standards	TCP/IP, DHCP, DNS, QoS, VoIP, SNMP, Syslog, NTP
Tools & Management	Network Monitoring, Performance Tuning, Capacity Planning, Change Management, Runbook Authoring, Technical Documentation
Certifications	AWS Cloud Practitioner Essentials Fortinet Cybersecurity Fundamentals Pursuing: CWNA, Ekahau ECSE, Cisco CCNP Enterprise

PROFESSIONAL EXPERIENCE

Network & Wireless Engineer | eNeoteric Consultancy Services

Sep 2023 – Present

Promoted to Network & Wireless Engineer (Dec 2023) from Graduate Trainee Engineer (Sep – Nov 2023) | Cisco SD-Access | SD-WAN | Wireless Infrastructure | Fortinet Security | EMEA Projects

- Designed and deployed Cisco SD-Access fabric architecture for enterprise environments, enabling micro-segmentation policy enforcement and scalable access-layer growth across a 500-endpoint network — eliminating legacy flat-network security gaps.
- Conducted enterprise wireless site surveys using Ekahau AI Pro across 5 office sites, producing predictive heat maps and passive validation reports; post-deployment validation confirmed WLAN coverage improved from 65% to 95% across surveyed floors.
- Planned and optimised WLAN deployments supporting 802.11ac/ax (Wi-Fi 6) infrastructure — including band-specific channel planning (2.4 GHz / 5 GHz / 6 GHz), AP placement, transmit power tuning, and seamless roaming configuration (802.11r/k/v), resulting in a sustained reduction in wireless helpdesk tickets.

- Engineered LAN/WAN solutions with optimised VLAN architecture, significantly reducing broadcast domain size and improving east-west traffic segmentation across multi-site topologies.
- Led LAN migration for 3 EMEA sites — executed end-to-end topology redesign, structured cabling validation, switch stack configuration, and cut-over planning, achieving 100% on-time delivery with zero unplanned downtime.
- Developed Cisco DNA Center automation templates for SD-WAN and LAN provisioning, reducing per-site device provisioning time from 4 hours to under 2 hours and minimising configuration drift across deployments.
- Configured and integrated Fortinet FortiGate firewalls with the SD-Access fabric, enforcing perimeter security policies, VPN tunnels, and NAC-based access control across enterprise edge environments.
- Resolved complex L2/L3 incidents — including STP topology loops, OSPF convergence failures, wireless client roaming failures, and DHCP/DNS conflicts — with structured root-cause analysis and minimal service disruption.
- Authored comprehensive technical documentation: network diagrams, configuration runbooks, change management records, and post-implementation reports for all deployed solutions.

EDUCATION

Bachelor of Computer Applications (BCA)

Babu Banarasi Das University, Lucknow, Uttar Pradesh

Aug 2019 – Jun 2022

ADDITIONAL INFORMATION

Languages: English (Professional Proficiency), Hindi (Native) | **Nationality:** Indian

Currently Pursuing: CWNA (Certified Wireless Network Administrator) | Ekahau ECSE | Cisco CCNP Enterprise
